

■ TacoAtlas Beta

Beta Tester Guide

March 2026 | Internal Beta

Hey! Thanks for helping test TacoAtlas before it goes live. You don't need to do anything crazy — just use it like you normally would, but keep an eye on a few specific things for me. Here's what to focus on.

First, get set up

- Download from the Play Store beta link I sent you
- Create an account with your real email — you'll get a confirmation link
- If you can, grab a friend to also sign up so you can test the friends stuff together

1 Drop a spot

Drop a pin somewhere you know — a taco spot, a restaurant, wherever.

- 1 Tap the + button and drop a pin on any location you recognize
- 2 Save it — does your pin show up on the map right away?
- 3 Tap the pin, then open the detail screen — does it load correctly?

2 Leave a review

Open one of your spots and go through the whole review flow.

- 1 Open a spot and tap Add Review
- 2 Go through the whole thing — taco entries, salsa, notes, stars
- 3 Submit it — does it save and show up on the spot page?
- 4 If you have more than one review, try collapsing and expanding them

3 Uninstall and restore

★ THE BIG ONE

This is the main thing I need you to test. Don't skip this one.

- 1 Make sure you have at least one spot saved
- 2 Uninstall the app completely
- 3 Reinstall and sign back in with the same account
- 4 You should see a "Welcome back" popup asking if you want to restore your spots
- 5 Tap Restore — your spots should come back

■ TEXT ME IF THIS BREAKS

If that popup doesn't show up, or your spots don't come back, text me right away. That's the thing I most need to know about.

4 Find a friend

You'll need another tester for this one.

- 1 Go to the Mi Gente tab and follow someone else who's testing
- 2 Once they add a spot, it should show up on your map as a colored pin (not a taco — those are just yours)
- 3 Check that their spots also show up in the Mi Gente feed

While you're at it

A few extra things to poke at if you feel like it:

- Edit a review after you've saved it — does it update correctly?
- Sign out and back in — do your spots still show?
- Add a pin with no review — does it still show in your list?

If something breaks

Just text me what you were doing and what happened. A screenshot helps. Don't worry about writing it up formally — a voice memo works too. The more specific the better though:

"it crashed when I tapped Restore" is way more useful than "it crashed."

Seriously, thank you. This is huge help. ■ TacoAtlas Beta
